

TOPS

Transition Outcomes Program for Students

STRIVE TOPS is especially designed for students who are in their 13th and 14th year of high school. In collaboration with area school districts, this ground breaking program assists students to generalize learned skills to new settings as well as acquire additional independent living skills, provide opportunities to increase their independence in the community, prepare the students to transition to adult services, and offer experiences that promote social skills with other students from the southern Maine area.

Meeting the Maine Department of Education's standards as a contracted service provider, **STRIVE's TOPS** program offers part-time and full-time program options as well as Extended School Year services for students from area school districts Monday through Friday based out of our newly renovated building.
